

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-3 (canceled).

Claim 4 (previously presented): A collection package for a vial, comprising:

a top;

a first side, connected to the top;

a bottom, connected to the first side;

a second side, connected to the bottom;

an internal separator a first compartment and a second compartment within the top, the first side, the second side and the bottom and having a retainer formed in the internal separator suitable for receiving the vial in the first compartment; and

a window for viewing the vial in the first compartment as received in the retainer.

Claim 5 (previously presented): The package of claim 4, further comprising:

a second window for viewing the second compartment and not the first compartment.

Claim 6 (previously presented): A collection package for a lab specimen, comprising:

a top;

a first side, connected to the top;

a bottom, connected to the first side;
a second side, connected to the bottom; and
an internal separator having a retainer formed therein for holding the specimen in position relative to the internal separator;
wherein the internal separator forms a first compartment and a second compartment, further comprising:
a window for viewing the first compartment; and
a second window for viewing the second compartment;
wherein the top, the first side, the bottom, the second side, and the internal separator are all formed by folding of a planar sheet.

Claim 7 (canceled).

Claim 8 (previously presented): A method of forming a container for a content, comprising the steps of:

folding a sheet to form a first side;
folding the sheet to form a top;
folding the sheet to form a second side;
folding the sheet to form a bottom;
folding the sheet to form an internal separator;
forming a retainer hole in the internal separator, suitable for retaining the content of the container;
forming a first window in the top; and

forming a second window in the bottom.

Claims 9-10 (canceled).

Claim 11 (previously presented): A system for containing a first content and a second content, comprising:

a fillable container;

a separator contained internally within the fillable container, the separator defining a first side and a second side of the separator;

a retainer contained internally within the fillable container, for maintaining the first content in position with respect to the separator;

wherein a first window of the fillable container allows viewing of the first content of the fillable container on the first side of the separator within the container;

wherein a second window of the fillable container allows viewing of the second content of the fillable container on the second side of the separator within the container.

Claim 12 (canceled).
